Abstracts

1,2,4-Trimethylbenzene, a flammable colorless liquid with a strong odor, occurs naturally in coal tar and petroleum. It is a major component (typically 40%) of a petroleum refinery distillation fraction known as the C9 aromatic fraction (or simply the C9 fraction).

SCOPE OF THE REPORT:

This report focuses on the 1,2,4-Trimethylbenzene in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Trimellitic anhydride is the largest application of 1,2,4-trimethylbenzene, others applications include mesitylene and so on. With increasing demand from downstream industry, 1,2,4-trimethylbenzene production shows continuous upward trend in the recent few years. FHR, Eni, Jiangsu Zhengdan, Nanjing Refinery and so on are among of key players in 1,2,4-trimethylbenzene industry at the moment.

Compared with foreign giants, 1,2,4-trimethylbenzene produced by Chinese manufacturers still has a certain performance gap. Chinese 1,2,4-trimethylbenzene manufacturers should be dedicated to improving their technology and narrowing down the performance gap with foreign giants. Besides, stimulated by downstream demand, 1,2,4-trimethylbenzene production in China will be released further in the coming years as some companies have add investments on their 1,2,4-trimethylbenzene businesses. We tend to believe that this industry still has a bright future, considering the current demand. As for product prices, the slow downward trend in recent years will continue in the next few years, since competition intensifies. Similarly, there will be fluctuations in

gross margin.

The worldwide market for 1,2,4-Trimethylbenzene is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
