Abstracts

3D printing is a kind of cumulative manufacturing technology, ie a machine for rapid prototyping technology, which is based on a digital model file, using a special wax material, powdered metal or plastic adhesive material, etc., by printing a layer of Bonding materials to make three-dimensional objects. At this stage, three-dimensional printers are used to make products. Layer-by-layer printing techniques to construct objects. The principle of a 3D printer is to put data and raw materials into a 3D printer. The machine will make products layer by layer according to the program.

SCOPE OF THE REPORT:

This report focuses on the 3D Metal Printing Machines in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
