### SCOPE OF THE REPORT:

This report focuses on the Adult Diaper Machine in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In the coming years there is an increasing demand for Adult Diaper Machine in the regions of China and Europe that is expected to drive the market for more advanced Adult Diaper Machine. An increasingly aging population, increasing living standards, better healthcare and growing health awareness, rising expenditure on health care and medical services, growing life expectancy and low market penetration (excluding Japan having almost 80% market penetration) will drive growth in United States, Japan and Europe markets. China is the largest export country that leading to 3% market penetration due to labor cost and consumption concept.

Globally, the Adult Diaper Machine industry market is concentrated as the manufacturing technology of Adult Diaper Machine is relatively matures than some high-tech equipment. And some enterprises, like Zuiko, GDM, Curt G Joa, Fameccanica, etc. are well-known for the wonderful performance of their Adult Diaper Machine and related services. At the same time, China, occupied 48.89% production volume market share in 2015, is remarkable in the global Adult Diaper Machine industry because of their market

share and labor status of Adult Diaper Machine.

The consumption volume of Adult Diaper Machine is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of Adult Diaper Machine industry may not keep that fast. But it is surely forecasted that the market of Adult Diaper Machine is still promising. The product average price declined in the past few years due to the technology development, the average price will keep the trend in the few future years due to increasing mature manufacturing technology and lowering cost of raw materials. The impact on the cost and availability of raw materials and certain components is uncertain due to potential supply changes. The costs of raw materials have a significant impact on the level of expenses. If the prices of raw materials and related factors such as energy prices increase, and if new companies cannot pass those price increases on to customers, their results of operations and financial condition would suffer. Although the market competition of Adult Diaper Machine is fierce globally, there are many enterprises can obtain considerable profit form the manufacturing and marketing of Adult Diaper Machine and that is the reason that we believe there will also be enterprises enter this market. But it is suggested that enterprises those have plans to enter this industry have careful analysis of this market and the advantages or disadvantages of themselves.

The worldwide market for Adult Diaper Machine is expected to grow at a CAGR of roughly 3.2% over the next five years, will reach 320 million US\$ in 2023, from 260 million US\$ in 2017, according to a new GIR (Global Info Research) study.
