Fiber optic sensors are fiber-based devices for sensing some quantity, typically temperature or mechanical strain, but sometimes also displacements, vibrations, pressure, acceleration, rotations or concentrations of chemical species. This report covered the Temperature Sensor, Pressure sensors and rayleigh sensors.

SCOPE OF THE REPORT:

This report focuses on the Aerospace Fiber Optic Sensors in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The consumption of Fiber Optic Sensors Consumption in Aerospace in 2011 is 10370 K Units, with the average growth rate above 15%, this number has reached 27221 K Units, according to the trends we estimate it will reach 60777 K Units around the world; Although there are many applications fields of Fiber Optic Sensors, such as Chemical Industry and Oil, aerospace is one of the most expensive field because its strict demand in the aerospace, the price of Aerospace Fiber Optic Sensors is higher than other fields. It has witnessed the decline of price from 744 USD to 618 USD for nearly 5 years. From the view of type, Temperature Sensor is most widely used form, it accounts for nearly 40% of the whole market, but the price of this kind sensor is not so expensive as other types;

From the view of applications, Health monitoring for airframes accounts for nearly half of the whole market, although this ratio has witnessed decline for the past few years, it still ranks the most popular position in aerospace application

As one kind of technology intensive industry, it needs solid R&D foundation of the companies, most companies in this report which ranked the top 10 market all has many

years' R&D experience and broadly market channel through wholesales and distributions. With the gross margin above 45%, it is worthwhile to enter this market.
