Abstracts

Aircraft Engine MRO is the description of maintenance repair and overhaul to aircraft engine, maintenance, repair and overhaul (MRO) is a key activity in the lifecycle of its engines. Because of the typically long operational lifetimes expected from these costly assets, MRO is necessary to maintain these systems in a safe and functional condition, so that they can fulfill the operational role that they were designed for.

The MRO system can be understood as a complex socio-technical system organized and operated to achieve aircraft availability and operation safety at minimal cost. As a complex socio-technical system, it consists of various layers: The environmental context, organizational structure, management, infrastructure, workers and the technical core.

SCOPE OF THE REPORT:

This report focuses on the Aircraft Engine MRO in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The largest aircraft engine MRO industry markets have been North America, Europe and China. And the market is supplied by a combination of large multinational firms and smaller local companies. The leading global firms include GE Aviation, Pratt & Whitney Division, Rolls Royce and MTU, among others. These companies tend to compete against each other globally to supply most of the largest aircraft engine MRO markets. In many markets, these leading global firms also face competition from local supplier. This growth of aircraft engine MRO industry is driven by the strong growth of the fleet in the last decade
