### SCOPE OF THE REPORT:

This report focuses on the Aircraft Seating in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

First, for industry structure analysis, the Aircraft Seating industry is relatively concentrated. These manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 90% of the revenue market. Regionally, Europe is the biggest production value area of valves, also the leader in the whole Aircraft Seating industry. Second, the production of Aircraft Seating increased from 493.66 K Units in 2011 to 770.84 K Units in 2015 with an average growth rate of more than 11%.

Third, Europe occupied 45.56% of the production market in 2015. It is followed by North America and Asia-Pacific, which respectively have around 31.97% and 18.38% of the global total industry. Other countries have a small amount of production.

Geographically, North America was the largest consumption market in the world, which took about 31.16% of the global consumption volume in 2015.

Fourth, for price trend analysis, a key variable in the performance of Aircraft Seating producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

Fifth, for forecast, the global Aircraft Seating revenue would keep increasing with annual growth rate with 8~11%. We tend to believe that this industry still has a bright future, considering the current demand of Aircraft Seating.

The worldwide market for Aircraft Seating is expected to grow at a CAGR of roughly 10.4% over the next five years, will reach 9870 million US\$ in 2023, from 5450 million US\$ in 2017, according to a new GIR (Global Info Research) study.
