## **Abstracts**

Alkyl polyglycosides (APGs) are a class of non-ionic surfactants widely used in a variety of household and industrial applications. They are derived from sugars and fatty alcohols; therefore, they are generally favored for their manufacture from renewable resources.

### **SCOPE OF THE REPORT:**

This report focuses on the Alkyl Polyglycoside (APG) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Europe is the largest market of alkyl polyglycoside, which occupies 49.32 percent of global alkyl polyglycoside production market share in 2014. It is followed by USA, which has around 22.44 percent of the global total industry. Other main regions which take important part in this industry include Japan and China.

Raw materials for alkyl polyglycosides are starch, glucose and fatty alcohol, on the global market, supply of raw materials is very full, but the upstream raw material prices have reduced, directly leading to the price decline of the product.

At present, alkyl polyglycoside belongs to the emerging of nonionic surfactant, its price has no competitive advantage, and therefore the downstream extension of recent years is not ideal enough.

The worldwide market for Alkyl Polyglycoside (APG) is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
