## Abstracts

Alpha-methylstyrene (AMS) is a product produced in parallel from the phenol reaction which is produced by the partial oxidation of cumene.

Alpha-methylstyrene is an intermediate chemical used in the manufacturing of plasticizers, resins, and in many polymerization production processes.

### SCOPE OF THE REPORT:

This report focuses on the Alpha-methylstyrene (AMS) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The AMS industry concentration is relatively high. The quantity of manufacturers is fewer in this industry, and high-end products are mainly from America and Western European countries.

In the world wide, giant manufacturers mainly distribute in America and Europe. America has a long history and unshakable status in this industry, like Honeywell and Axiall, both have perfect products. As for France, the Novapex has become a global leader. In Germany, it is Novapex that led the technology development. In China, the manufacturers focused in Jiangsu and Jilin provinces. Russia is a large player in this market too.

Many companies have several plants, usually close to raw material bases. There are many producers to devote into benzene industry chain optimization.

The worldwide market for Alpha-methylstyrene (AMS) is expected to grow at a CAGR of roughly 0.8% over the next five years, will reach 370 million US\$ in 2023, from 350 million US\$ in 2017, according to a new GIR (Global Info Research) study.
