Abstracts

Aluminum chlorhydrate (ACH) is a chemical compound which has several applications, which made by reacting aluminum with hydrochloric acid, is also referred as aluminum chlorohydrate. ACH is a workhorse product in drinking water and industrial wastewater applications, as it can provide performance across a wide variety of water conditions. In additional, ACH is one of the most common active ingredients in commercial antiperspirants and can also be used in pulp and paper industry.

SCOPE OF THE REPORT:

This report focuses on the Aluminum Chlorhydrate in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Currently, the aluminum chlorhydrate manufacturers mainly concentrate in North America, including Kemira, Chemtrade, GEO, etc. The production of aluminum chlorhydrate increased from 72126 MT in 2011 to 88682 MT in 2015, with an average growth rate of 5.31%.

In consumption market, North America and Europe are still the dominate consumption regions due to the advanced production technology and rapid development of economy, with the consumption volume market share of 35.06% and 23.62% respectively in 2015. There are two major types of aluminum chlorhydrate: liquid aluminum chlorhydrate and solid aluminum chlorhydrate. It can be widely used in many industries. Survey results showed that in 2015, 69.83% of the aluminum chlorhydrate was used in water treatment industry, 7.62% in pulp & paper industry, 17.62% in cosmetic industry, and 4.93% divided among other industries. With the development of economy, the demand for aluminum chlorhydrate will continue to increase. Therefore, aluminum chlorhydrate has

a huge market potential in the future.

The major raw materials for aluminum chlorhydrate are aluminum and hydrochloric acid. On the global market, supply of raw materials is full. Fluctuations in the price of the upstream product will impact on the production cost of aluminum chlorhydrate industry. We tend to believe this industry is an emerging industry, and the consumption increasing degree will show a smooth growth curve. For product prices, the slow downward trend in recent years will maintain in the future as competition intensifies. Besides, prices gap between different brands will go narrowing gradually. Also, there will be fluctuation in gross margin.

The worldwide market for Aluminum Chlorhydrate is expected to grow at a CAGR of roughly 3.4% over the next five years, will reach 100 million US\$ in 2023, from 83 million US\$ in 2017, according to a new GIR (Global Info Research) study.
