### SCOPE OF THE REPORT:

This report focuses on the Ammonia in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. According to the statistics, ammonia industry concentration is relatively low. The top ten manufacturers were counted for about 18.19% production market share in 2015. In this report, we list the top twenty-eight enterprises including Yara? CF Industries? Agrium? Group DF? Qafco? PotashCorp? TogliattiAzot? Eurochem and Acron etc. Geographically, the production regions of world ammonia include North America, Europe, Middle East, India and China etc. China was definitely the major production region, which dominated the market with 34.84% production market share in 2015. However, the production concentration is very fragment in China with hundreds of small enterprises located throughout China. Europe, North America was the other two players with 10.09% and 9.31% production market share respectively in 2015. As for the raw materials of ammonia, there is an obvious difference between China and other regions. In China, majority of enterprise use the coal, which is estimated account for 85%. While in Europe and North America etc. regions, the natural gas is the major raw materials due to the abundant natural gas resources in local.

The worldwide market for Ammonia is expected to grow at a CAGR of roughly 1.1% over the next five years, will reach 76100 million US\$ in 2023, from 71200 million US\$ in 2017, according to a new GIR (Global Info Research) study.
