Arsenic removal refers to the equipment used to remove the arsenic from the water. It is necessary step to clean the drinking water, which can meet the state standards. Arsenic occurs naturally in groundwater, less commonly in surface waters. Arsenic is a known carcinogen, increasing the risk of cancer even at very low concentrations.

SCOPE OF THE REPORT:

This report focuses on the Arsenic Removal in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Currently, some companies in the world can produce arsenic removal equipment, mainly concentrating in Europe and USA. The main market players are Lenntech, Severn Trent Service, Tonka Water, AdEdge Water Technologies, Layne, etc. In China, Yadong Bio Equipment and Beijing Zhongke are the manufactures.

In consumption market, the growth rate of global consumption is smooth relatively. USA and Europe are still the mainly consumption regions due to the advanced production technology and rapid development of economy.

A wide range of technologies has been developed for the removal of high concentrations of arsenic from water. The most common arsenic removal technologies use precipitative process, adsorptive process, ion exchange process and membrane process. It can be widely used in the water treatment industry. With the development of economy, the water treatment industries will need more arsenic removal equipment. So, arsenic removal industry has a huge market potential in the future.

The major raw material for arsenic removal include aluminum oxide, oxide resin (such as hydrous iron oxide resin etc.), titanium oxide, ferric oxide, ferric hydroxide, zeolite

molecular sieve, anion exchange membrane, etc. On the global market, supply of raw materials is full. Fluctuations in the price of the upstream product will impact on the production cost of arsenic removal industry.

Compared with international leading players, Chinese domestic manufacturers still have certain gap, both in the product performance and market share. As the development of China economic and technology, China will have good products like overseas manufacturers.

The worldwide market for Arsenic Removal is expected to grow at a CAGR of roughly 2.2% over the next five years, will reach 630 million US\$ in 2023, from 560 million US\$ in 2017, according to a new GIR (Global Info Research) study.
