Abstracts

The asphalt pump is a device to transfer asphalts, bitumen, pitch, tar, bunker oils, residual oils and related materials that solidify at ambient temperatures. It is always used in the petrochemical, constructions, transportation and other related industries.

SCOPE OF THE REPORT:

This report focuses on the Asphalt Pumps in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

As for the China asphalt pump industry; the industry structure is relatively concentrated. The top seven manufacturers have 77.24% revenue market share in 2015. The China giant Shanggui, which has 37.88% market share in 2015, is the leader in the asphalt pump industry. The manufacturers following Shanggui are YuanDong and Johnson, which respectively has 10.01% and 8.80% market share in China.

The downstream industries of asphalt pump products are Refinery & Storage Tank, Asphalt Mixing Plant, Road Construction and Building, Coating and Seal Materials. In the recent years, with the limitations of government policy and sluggish economy, the consumption decrease of asphalt pump will be obvious. In the foreseeable future, the asphalt pump products will show an bearish downward trend.

Although sales of asphalt pump products bring a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter into the asphalt pump field hastily.

The worldwide market for Asphalt Pumps is expected to grow at a CAGR of roughly

xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
