## Abstracts

This report studies the Atrial Fibrillation Devices market. Atrial fibrillation (also called AFib or AF) is a quivering or irregular heartbeat (arrhythmia) that can lead to blood clots, stroke, heart failure and other heart-related complications. Atrial Fibrillation Devices are the devices used for atrial fibrillation therapy, including access, diagnostic, visualization and ablation products to assist physicians in diagnosing and treating various irregular heart rhythms.

### SCOPE OF THE REPORT:

This report focuses on the Atrial Fibrillation Devices in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

About 4.4% people out of diagnosed atrial fibrillation population are treated using ablation technology in the U.S., Europe, and Japan combined. The atrial fibrillation population treated with ablation is expected to grow with a double digit rate in these regions. The increasing prevalence of atrial fibrillation and advancement in the ablation technologies drive the use of ablation products in the treatment of atrial fibrillation.

This market is segmented, on the basis of surgical procedures, into catheter ablation and surgical ablation. Catheter ablation procedures hold the maximum share in this market and are expected to grow with the highest CAGR during forecast period of 2018 to 2025.

The geographical segmentation includes North America, Europe, Asia-Pacific, South America and Middle East & Africa. North America holds the largest share in this market. However, Asia-Pacific is expected to witness the highest growth rate owing to the presence of a large patient population, growing medical tourism, and high focus of

global market players on emerging Asia-Pacific countries such as China and India.

The worldwide market for Atrial Fibrillation Devices is expected to grow at a CAGR of roughly 9.3% over the next five years, will reach 4100 million US\$ in 2023, from 2410 million US\$ in 2017, according to a new GIR (Global Info Research) study.
