Abstracts

Autocrane means a lifting device incorporating a cable suspended latticed boom or hydraulic telescopic boom designed to be moved between operating locations by transport over the road.

The most basic type of mobile crane consists of a steel truss or telescopic boom mounted on a mobile platform, which may be wheeled (including 'truck' carriers). The boom is hinged at the bottom, and can be raised and lowered by cables or by hydraulic cylinders.

In this report, we mention the autocrane including rough-terrain crane, all-terrain crane and truck crane, do not include crawler crane.

SCOPE OF THE REPORT:

This report focuses on the Autocrane (Auto Crane) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

For industry structure analysis, the Autocrane industry is not that concentrated. XCMG, Tadano

Zoomlion, Manitowoc and Liebherr are famous in the industry for the wonderful performance of products and satisfactory service. But the market competition is getting fierce, with growing number of manufacturers entering the market; especially several Chinese manufacturers those have cost advantages.

For price trend analysis, a key variable in the performance of Autocrane producers is components and raw material costs, specifically the speed at which any increase can be passed through to customers.

The global Autocrane revenue is forecasted to recovery. We tend to believe that this

industry still has a bright future, considering the current demand of Autocrane driven by urbanization in developing countries. As for product prices, the slow downward trend in recent years will continue in the next few years, as competition intensifies. Similarly, there will be fluctuations in gross margin.

The worldwide market for Autocrane (Auto Crane) is expected to grow at a CAGR of roughly 3.9% over the next five years, will reach 7960 million US\$ in 2023, from 6320 million US\$ in 2017, according to a new GIR (Global Info Research) study.
