Abstracts

Electric water pump is activated by battery and motor only on demand for cooling. The just function minimizes the load on engine.

Electric water pumps are a part of a growing number of newer vehicles where higher efficiency engines are demanded. Aside from providing standard engine cooling, they reduce engine load and can be controlled by sensors to provide the necessary amount of coolant at any time. Some new vehicles even use up to three pumps for various systems, including cabin heating, turbocharger and battery system cooling.

SCOPE OF THE REPORT:

This report focuses on the Automotive Electric Water Pump in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Consumers are generally quick-change, to get or use newfangled products, better experience, better convenience and more quicker; to find and meet the needs of consumers, and exceeding expectation, better service. The world changes quickly, especially in mobile internet and consumer electronics, and now the mobile internet and consumer electronics are changing the traditional sectors, to more efficient, more cheaper and powerful.

At present, global economy is fluctuant, and most countries take measures to stimulate the economy, especially in Japan, Europe, Australia and the resources providing countries, like Russia, Middle East, Brazil etc. In many fields, China is the largest consumer, but in the past several years, China's economic growth slows. The China government is reforming the economic structure, to release energy of economy. USA economy is relatively stable with low-speed-growth, but in future, it also is full of risk. In

Southeast Asia, the economy also is fluctuated the economic base is comparatively unsubstantial, due to the exchange fluctuations. In India, although many people look to further increase in India, but the economic aggregate is too low and the infrastructure is behindhand and inefficient. On the other hand, the political factors, like government succession, security fears, trade dispute, domestic employment, even the regional military crisis, always affect the economic activity, country to country, corporation to country. So it needs us with deep insight, to analyze the prospect avoid risk, to grasp the opportunity and reduce losses.

The worldwide market for Automotive Electric Water Pump is expected to grow at a CAGR of roughly 6.7% over the next five years, will reach 1280 million US\$ in 2023, from 870 million US\$ in 2017, according to a new GIR (Global Info Research) study.
