Abstracts

Automotive torque converter is a fluid coupling that functions as a means of transferring power from the engine to the transmission.

An automotive torque converter is comprised of an impeller, turbine, stator, and front cover, these parts work in conjunction with one another to transfer power from the engine to the transmission by swirling fluid around. The impeller, which is sometimes referred to as the pump, is welded to the front cover, is not physically connected to the turbine, which drives the input shaft on the transmission. The front cover is bolted to the flex plate, and as it rotates the impeller, the increasing velocity of the transmission fluid transmits power to the turbine and transmission input shaft.

SCOPE OF THE REPORT:

This report focuses on the Automotive Torque Converter in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The main consumption regions are concentrated in the Japan & Korea, China and North American. The Automotive Torque Converter's consumption has great relationship with the local economical developed level and automotive type, the production of AT and CVT has great relationship with the consumption of torque converter.

The import and export volume is relative small, China has very large export ratio. Currently, the Automotive Torque Converter has a certain degree of anti-dumping phenomenon.

In the future, the Automotive Torque Converter will have a good future; the price fluctuation has relationship with the raw material and the anti-fire degree. The technology will more mature and the industry is more dispersion. The production of the

automotive torque converter has great relationship with the automotive transmission's development and the rate.

The worldwide market for Automotive Torque Converter is expected to grow at a CAGR of roughly 0.2% over the next five years, will reach 540 million US\$ in 2023, from 540 million US\$ in 2017, according to a new GIR (Global Info Research) study.
