## **Abstracts**

Automotive wire is an important part of automotive electronic control system. It is bonded, twisted, or braided together to form a single assembly as the circuit in an automotive. Automotive wires are used to transmit electric power, data and other signals as voice in the vehicles. The working environment required the wire to have characteristics like high temperature resistant.

### **SCOPE OF THE REPORT:**

This report focuses on the Automotive Wire in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Wire are vital components within modern transportation platforms such as aircraft and automobiles, distributing power and signals between the various devices that deliver electrical and electronic functionality.
