## Abstracts

Belt weigher (or belt scale, belt conveyer scale) is an automated system designed to control, regulate and totalize continuous flow of bulk material. A belt weigher consists of a weigh frame fitted with a load cell that is mounted in the conveyor frame and connected to a digitizer to translate the weight readings into a flow rate and total weight.

### SCOPE OF THE REPORT:

This report focuses on the Belt Weigher in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Belt weigher market shows a sign of instability over the recent years. The market saw its best time around 2012, but then started to decrease. The market was at its bottom in 2014 and recovered a bit in 2015. Due to the fluctuation of coal market, the growth is slow and gross margin has gradually decreased.

From a supply perspective, in the past few years, fewer companies entered the belt weigher industry, and there is enough supply of belt weigher in the market.

From a demand perspective, the current demand for belt weigher production is growing.

The worldwide market for Belt Weigher is expected to grow at a CAGR of roughly 2.1% over the next five years, will reach 160 million US\$ in 2023, from 140 million US\$ in 2017, according to a new GIR (Global Info Research) study.
