A biologic is a medicine made using a living system, and historically this was often an animal. Most products being developed as biosimilars are recombinant proteins, or proteins derived from genetically engineered DNA. In this report is a biologic defined as proteins, peptides, hormones or antibodies drugs production by bio-engineered technology, but does not include a vaccine.

SCOPE OF THE REPORT:

This report focuses on the Biologics and Biosimilars in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Most of biologics manufacturer are concentrated in US, Germany, UK and other developed countries. But in biosimilars industry the situation is different, manufacturer in developing countries play a very important role.

Through the research we tend to believe that the growth of biologics industry maybe slow but high profits during the period of patent may attractive. As to biosimilars, now is a change for newcomers and they will greatly change the industry.
