Abstracts

Bromine (Br₂) is a reddish brown liquid that gives off dark red, highly corrosive fumes having a sharp, penetrating odor. It is indispensable raw material for inorganic pharmaceuticals, photosensitive materials, dyes and medicine. It is also the base ingredient used in the manufacturing of hydrobromic acid (HBr) which is further utilized as a raw material for organic intermediates and medicines including lithium bromide and terephthalic acid. It is obtained from seawater, natural brines, or as the by-product brines of potash recovery.

SCOPE OF THE REPORT:

This report focuses on the Bromine in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. In the recent years, bromine capacity showed a trend of steady growth. At present, the major manufacturers of bromine are concentrated in ICL, Albemarle and Chemtura Corporation. ICL-IP is the world's largest bromine producer having access to the largest and richest bromine reserves at the Dead-Sea. China is the largest producer and consumers in Asian.

The raw material of bromine is from brine water or seawater, and the Dead Sea is rich in bromine resources, so the region near the Dead Sea is the world's largest production base of bromine.

On process and product quality, compared to the product in global market, there is a gap between China and US and Europe, but the prices of the product in China is high, because the bromine is short supply in China.

The product has high value, and the price of the product is also high. The price of

bromine is affected by the raw material supply. In addition, the price of bromine is also affected by the global economy influence.

Overall, although some factors limit the development of the market, because of the improvement of manufacturing technology, the bromine industry will be promoted in coming years. Therefore, we recommend you enter into the field if you have fixed downstream customers.

The worldwide market for Bromine is expected to grow at a CAGR of roughly 3.0% over the next five years, will reach 2780 million US\$ in 2023, from 2320 million US\$ in 2017, according to a new GIR (Global Info Research) study.
