Calcium gluconate, manufactured by the neutralization of gluconic acid or glucose with calcium carbonate, is an ideal source of calcium, a vital ingredient for strong bone and teeth formation. It also helps to maintain a regular heartbeat and transmission of nerve impulses.

SCOPE OF THE REPORT:

This report focuses on the Calcium Gluconate in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In consumption market, the growth rate of global consumption is smooth relatively.

China and India are still the mainly consumption regions due to the advanced production technology and wide range of downstream areas.

Calcium gluconate can be classified as two major types: food grade and pharmaceutical grade. It can be widely used in many industries. The food industry is the major consumption market. With the development of economy, these industries will need more calcium gluconate. So, calcium gluconate has a huge market potential in the future.

The major raw material for calcium gluconate is calcium carbonate, glucose, etc. On the global market, supply of raw materials is full. Fluctuations in the price of the upstream product will impact on the production cost of calcium gluconate industry.

We tend to believe this industry is a promising industry, and the consumption increasing degree will show a smooth growth curve. For product prices, the slow downward trend in recent years will maintain in the future as competition intensifies. Besides, prices gap between different brands will go narrowing gradually. Also, there will be fluctuation in gross margin.

The worldwide market for Calcium Gluconate is expected to grow at a CAGR of roughly 3.2% over the next five years, will reach 100 million US\$ in 2023, from 81 million US\$ in 2017, according to a new GIR (Global Info Research) study.
