## Abstracts

Car Bumper is usually a metal bar or beam, attached the vehicle's front-most and rear-most ends, designed to absorb impact in a collision. The main function of a bumper is to protect the car's body in a slight collision, typically at parking speed. Front and rear bumpers on today's cars generally consist of a plastic cover over a reinforcement bar made of steel, aluminum, fiberglass composite or plastic.

### SCOPE OF THE REPORT:

This report focuses on the Car Bumpers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Asia-Pacific sales of Car Bumper have been increasing during the past five years with an average growth rate of 11%. Asia-Pacific sales of Car Bumper is expected to be over 100 million units in 2016 and more than 75% have been sales in China and Japan regions. For the product types, Plastic Car Bumper occupies the largest market share (about 94% in 2016), and followed by Metal Car Bumper (about 6% in 2016).

The Car Bumper industry is concentrated; there are 11 manufacturers (about 82% of Asia-Pacific total sales) counted in the report. Major manufactures are Tong Yang, Hyundai Mobis, Plastic Omnium, HuaYu Automotive, Seoyon E-Hwa, Jiangnan MPT, Ecoplastic, SMP, Zhejiang Yuanchi, Benteler, and Magna.

Due to national industrial policy support and growing industry standardization, Car Bumper Industry is developing in the good direction. Despite the presence of competition problems, due to the global recovery trend, investors are still optimistic about this area; the future will still have more new investment enter the field. For the fierce competition between suppliers, the price and gross margin is expected to

decrease further.

But we also should notice that there is a gap in the sales technology and equipment compared to developed countries. Domestic industry should focus on research on new material and process. The falling prices of raw materials could be a good signal for Automotive Bumper Industry.

The worldwide market for Car Bumpers is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.

Market Segment by Manufacturers, this report covers

Tong Yang
