Cinema Lenses are used to record continuous motion and are used to shoot video and digital broadcasts.

SCOPE OF THE REPORT:

This report focuses on the Cinema Lenses in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
Sony accounted for 22.084% of the global cinema lenses production volume market share in 2017. Other players accounted for 18.429%, 18.786% individually, such as Zeiss and Canon.
Global giant manufactures mainly distributed in EU and Japan. They have unshakable status in this field. The key product markets locate at EU and Japan. In recent years, with the development of mobile phones, etc., the growth of cinema lenses has not been as great as the camera lens, but it has limited the growth rate to some extent. We predict that the future growth rate will be reduced.
For part relatively high-price lens, there are not only sales, but also rental business. But the rental business is not counted in this report. In recent years, the market has been affected, and the growth rate of the market has slowed down. Compared with other electronic products, products have been updated slowly. In addition, competition has become fiercer and the prices of products have declined slowly.

The worldwide market for Cinema Lenses is expected to grow at a CAGR of roughly 3.1% over the next five years, will reach 4080 million US$ in 2023, from 3400 million US$ in 2017, according to a new GIR (Global Info Research) study.
