SCOPE OF THE REPORT:

This report focuses on the Cocamine Oxide in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The Cocamine Oxide industry concentration is not very high; there are many manufacturers in the world, and high-end products mainly from Japan, Americas and Europe. In the world wide, giant manufactures mainly distribute in Americas and China such as Solvay, Kao Chemicals, Stepan Company and Clariant.

Due to the wide downstream consumption of the Cocamine Oxide, it should have large production share in daily chemical products, it has many substitute goods and the production of cocamine oxide is not very large. There are a few companies with several plants. Recent years, there are some companies starting to research and development the product. The industry will form a much high concentration of global market competition in future. At present, the top five companies account for about 40% of global market share in Cocamine Oxide field.

After decades of development, the giant manufacturers have proven technique. The Cocamine Oxide industry in China developed in about 1990s but the technology level of this product is not high.

The technological level of Cocamine Oxide in China has a big gap compared with the international advanced level. Outstanding performance in product application performance is not outstanding, function is not strong, supporting enough, clean low level, product updates slow, long development cycle. There is little Cocamine Oxide performance in China at or near the international advanced level.

The global production and capacity of Cocamine Oxide are fluctuant in a small range in the past five years; the capacity is from about 93000 to 114000 MT while the production is from 77000 to 94000 MT. It is expected that it will increasing in future.

The worldwide market for Cocamine Oxide is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
