### SCOPE OF THE REPORT:

This report focuses on the Coin-Operated Laundry Machines in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Coin-Operated Laundry Machines require users to enter a requisite amount in coins to be able to use the machine for a specified time. Once the user has entered the amount the integrated timer in the machine sets up itself and does not require to be monitored. Since the Coin-Operated Laundry Machines required the user to pay the usage amount in advance, there is no need for a separate billing counter. This means hassles free payments, and that too without long queues. This also saves the laundromat extra space for more machines and drying area.

Since these machines maintain records of time automatically and directly collect money from the users, no separate billing and time recording staff is required. Few support staff are still a requisite to clean the laundry area and assist the users, but their number is far less than those required in general washing and drying machines.

The worldwide market for Coin-Operated Laundry Machines is expected to grow at a CAGR of roughly 2.7% over the next five years, will reach 2300 million US\$ in 2023, from 1960 million US\$ in 2017, according to a new GIR (Global Info Research) study.
