Abstracts

Colour steel or colour coated steel is cold rolled steel and galvanized steel substrate. It is surfaced preparation and applied a continuous coating, which made after baking and cooling products. Coated steel sheet is light, beautiful and good corrosion resistance. It could be directly processed and apply in Construction, shipbuilding, vehicle manufacturing, the furniture industry, electrical industry to provide a new type of raw material. It played with steel and wood, efficient construction, energy conservation, pollution prevention and other good results.

SCOPE OF THE REPORT:

This report focuses on the Colour Steel in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The growth of the downstream industries is the key driving force for the coated steel market. For example, in the refrigerator market, the sales in the Asia-Pacific region have witnessed a steady growth in the past few years. China, Korea, Japan and India are the key production hubs of refrigerators due to huge domestic demand and low production costs. The great demand from such end-use industry has driven the market for coated steel. The increasing potential to spend on upgrades for kitchens, roofing, and basic home improvements and additions most of which include steel coated products are driving the coated steel market.

In 2017, the polyester Colour Steel segment accounted for the largest market share, in terms of value. Polyester resins form highly durable structures and coatings are cross-linked with a vinylic reactive monomer, which is most commonly styrene. The current industry trend highlights the use of polyester resin above all other resin types. In

addition, it has limited use in the coatings industry primarily because curing is strongly inhibited by oxygen, leaving the surface of the polyester-coated steel soft and sticky. Due to these properties, the polyester-coated steel are the most broadly used coated steel, globally.

The worldwide market for Colour Steel is expected to grow at a CAGR of roughly 6.8% over the next five years, will reach 31700 million US\$ in 2023, from 21400 million US\$ in 2017, according to a new GIR (Global Info Research) study.
