Abstracts

Concrete Waterproofing Admixture is a type of integral waterproofing material that can be mixed with concrete mixture, and mainly used in all kinds of anti-permeability concrete engineering.

SCOPE OF THE REPORT:

This report focuses on the Concrete Waterproofing Admixture in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The concrete waterproofing admixture industry concentration is relatively low; there are over three hundred manufacturers all over the world, but only a few manufacturers dominate the high-end products market, like Kryton, Xypex Chemical, Fosroc, Grace, Hycrete, SIKA, BASF Rheomac, Penetron, Schomburg, Markham Global and IPA Systems etc. which are almost located in USA Canada and Germany and UK. Most of the rest of manufacturers are some small-scale enterprises and produce the low-end products, mainly distributed in the developing regions like Asia and South America etc. All manufactures in the world are committed to the improvement of product. These several years, some Chinese manufactures were aimed at improving their technology, but their product quality still cannot catch up with the international ones?, so they took low-end market in China.

We tend to believe this industry now is close to mature, and the consumption increasing

degree will show a smooth curve. On product prices, the slow downward trend in recent years will maintain in the future, as competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin.

The worldwide market for Concrete Waterproofing Admixture is expected to grow at a CAGR of roughly 3.0% over the next five years, will reach 1180 million US\$ in 2023, from 990 million US\$ in 2017, according to a new GIR (Global Info Research) study.
