Abstracts

Corrugated plastic is usually made from polypropylene which is capable of being recycled. Fluted (corrugated) Polypropylene (PP) sheet, a polyolefin product, is a lightweight, material known for its versatility across many industries and applications. Fluted PP is used in Graphic Arts, Packaging, Agriculture, Automotive and Industrial markets. Common applications include signage, trade show and retail display, binding/stationary, crates, as separators or liners in packaging, vehicle trunk liners, and more. Sturdy, reusable, recyclable, returnable, waterproof fluted polypropylene shipping containers are superior to corrugated paper. Polypropylene offers good resistance to chemical or acid attacks and has low moisture absorption and superior electrical insulation.

SCOPE OF THE REPORT:

This report focuses on the Corrugated Plastic Board in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The market is driven by various end-user industries, such as graphic arts and signage, packaging and storage, agriculture, automotive, building and construction and so on. As the downstream consumption usually follows with developed and rapid economic growth areas, such as BRICS, the developed areas' company prefers investing to underdevelopment regions these years.

The market for Corrugated Plastic Board is highly fragmented with major players such as Coroplast (Inteplast Group), Primex Plastics, Karton, SIMONA, DS Smith, Distriplast, Sangeeta Group, Northern Ireland Plastics, Zibo Kelida Plastic, Tah Hsin Industrial, Twinplast, Plastflute, Creabuild, Corex Plastics and so on. There are many small

companies in this market.

The leading companies own the advantages on better performance, more abundant product's types, better technical and impeccable after-sales service. As competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin.

The uses corrugated plastic board are put to demonstrate its fantastic versatility. New uses are being identified almost every day. Demand for corrugated plastic is sure to grow, but as many of the plastics used are dependent on crude oil, the raw material costs are subject to the fluctuations (and inevitable growth) of oil prices. This may prove to be a controlling factor.

Significant and lasting barriers make entry into this market difficult. These barriers include, but are not limited to: (i) product development costs; (ii) capital requirements; (iii) intellectual property rights; (iv) regulatory requirement; and (v) Transitions' unfair methods of competition.

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Even so, the market is intensely competitive. The study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.

The worldwide market for Corrugated Plastic Board is expected to grow at a CAGR of roughly 7.1% over the next five years, will reach 3040 million US\$ in 2023, from 2010 million US\$ in 2017, according to a new GIR (Global Info Research) study.
