### SCOPE OF THE REPORT:

This report focuses on the D-Xylose in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

D-xylose can be classified into two types: raw material grade D-xylose and refine grade D-xylose. Raw material grade D-xylose is widely used in xylitol industry and glycoside industry. Refine grade D-xylose is widely used in food and beverage industry, flavor and fragrance industry, pet food industry and other industries. With the development of economy, these industries will need more D-xylose. So, D-xylose has a huge market potential in the future.

We tend to believe this industry is an emerging industry, and the consumption increasing degree will show a rapid growth curve. For product prices, the slow downward trend in recent years will maintain in the future as competition intensifies. Besides, prices gap between different brands will go narrowing gradually. Also, there will be fluctuation in gross margin.

The worldwide market for D-Xylose is expected to grow at a CAGR of roughly 1.4% over the next five years, will reach 270 million US\$ in 2023, from 250 million US\$ in 2017, according to a new GIR (Global Info Research) study.
