Abstracts

Denim jeans are trousers typically made from denim fabric. They are now a very popular article of casual dress around the world. They come in many styles and colors. However, denim blue jeans are particularly identified with US culture, especially the United States Old West. As well, although denim jeans are mostly known as a fashion garment in the 2010s, they are still worn as protective garments by some individuals, such as cattle ranch workers and motorcycle riders, due to their high durability as compared to other common fabrics.

SCOPE OF THE REPORT:

This report focuses on the Denim Jeans in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Since the post war era, the denim jeans became popular among young people. Denim jeans are a cornerstone of the American wardrobe and an important cotton product (accounting for almost one-fifth of all cotton clothing at retail). Almost all U.S. consumers own denim jeans and most of them say their closets are full of denim and they enjoy wearing it regularly. Denim jeans are purchased for durability, longevity, and versatility because consumers find greater value in a product they know will last longer and fit better; therefore price is not the main factor in the denim jeans purchase decision, unlike other clothing. This positioning ensures that denim jeans will continue to have a place on store shelves and in consumers' closets. And the brands that consumers' favorite are Levi's, Lee, Wrangler, Gap Inc., Old Navy, and so on.

The worldwide market for Denim Jeans is expected to grow at a CAGR of roughly 0.8% over the next five years, will reach 60200 million US\$ in 2023, from 57400 million US\$ in 2017, according to a new GIR (Global Info Research) study.
