Abstracts

Dimethylaminopropylamine (DMAPA) is a clear, essential colorless liquid with a typical amine odor. It is completely soluble in water. They consist of benzene, heptane, and other organic solvents.

SCOPE OF THE REPORT:

This report focuses on the Dimethylaminopropylamine (DMAPA) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Acrylonitrile and dimethylamine are the two main raw materials for the production of dimethylaminopropylamine (DMAPA). With the development of the downstream industries, dimethylaminopropylamine (DMAPA) production has kept increasing in recent years.

During the manufacturing process, BASF is almost on the industrial monopoly position. The production of BASF is about 50% of the global total production. With the operation in Nanjing this year, BASF's position in the industry is difficult to shake. We guess that, in the next few years, BASF will still be the industrial leader.

Currently, due to immature technology, there are only few manufacturers in China. dimethylaminopropylamine (DMAPA) consumers have to import from others.

The worldwide market for Dimethylaminopropylamine (DMAPA) is expected to grow at a CAGR of roughly 2.0% over the next five years, will reach 290 million US\$ in 2023, from

260 million US\$ in 2017, according to a new GIR (Global Info Research) study.
