Abstracts

Dispersing machines are used in all areas of industry where mixing of liquids or liquids with solids is required. A disperser will generate the shear force necessary to rapidly de-lump powders in a liquid. This de-lumping process is called dispersion. A disperser is a high-powered, low volume pump. Considering its substantially higher horsepower per gallon requirement, a disperser is an inefficient mixer.

SCOPE OF THE REPORT:

This report focuses on the Dispersion Machine in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. In the coming years there is an increasing demand for Dispersion Machine in the regions of Europe and Japan that is expected to drive the market for more advanced Dispersion Machine. Growth in government budgets in the principal countries, increasing of medical treatment expenditures, more-intense competition, launches in introducing new products, increasing of spending on daily chemical industry, retrofitting and renovation of old technology will drive growth in Europe and Japan markets. Globally, the Dispersion Machine industry market is not concentrated as the manufacturing technology of Dispersion Machine is relatively matures than some high-tech equipment. And some enterprises, like IKA, Netzsch, Ross, Fluko, etc. are well-known for the wonderful performance of their Dispersion Machine and related services. At the same time, China, occupied 25.22% production market share in 2015, is remarkable in the global Dispersion Machine industry because of their market share and technology status of Dispersion Machine.

The consumption volume of Dispersion Machine is related to downstream industries

and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of Dispersion Machine industry may not keep that fast. But it is surely forecasted that the market of Dispersion Machine is still promising.

The worldwide market for Dispersion Machine is expected to grow at a CAGR of roughly 2.8% over the next five years, will reach 120 million US\$ in 2023, from 110 million US\$ in 2017, according to a new GIR (Global Info Research) study.
