SCOPE OF THE REPORT:

This report focuses on the Dry Ice Machine in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

For industry structure analysis, the Dry ice machine industry is concentrated. A variety of manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. But few manufacturers dominated the market. The top five producers account for about 69.91% of the revenue market.

Europe occupied 48.82% of the production market in 2015. It is followed by US and Asia-Pacific, which respectively have around 31.12% and 13.78% of the global total industry. Other countries have a small amount of production. Geographically, Europe was the largest consumption market in the world, which took about 38.71% of the global consumption volume in 2015. US shared 32.95% of global total.

For forecast, the global Dry ice machine revenue would keep increasing with annual growth rate with 5~10%, and a little higher speed in China. We tend to believe that this industry still has a bright future, considering the current demand of Dry ice machine. As for product prices, the slow downward trend in recent years will continue in the next few years for the technology progress, as competition intensifies. Similarly, there will be

fluctuations in gross margin.

The worldwide market for Dry Ice Machine is expected to grow at a CAGR of roughly 6.3% over the next five years, will reach 220 million US\$ in 2023, from 160 million US\$ in 2017, according to a new GIR (Global Info Research) study.
