Abstracts

Electrical insulating varnish are used to ensure electrical devices, including motors, generators, transformers, sensors and other devices that function by electromagnetic induction, have the necessary electrical insulation and structural integrity for operation. Insulating varnishes and impregnating resins are almost always thermosetting resins such as epoxies or phenolics. This material is crosslinking when applied and therefore inherently strong, environmentally stable, impervious and durable.

SCOPE OF THE REPORT:

This report focuses on the Electrical Insulating Varnish in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. At present, in the foreign industrial developed countries the electrical insulating varnish industry is generally at a more advanced level in developed countries, the world's large enterprises are mainly concentrated in the United States, Switzerland, Japan, Britain, etc. accounted for most of the international market share. Meanwhile, foreign companies have more advanced equipment, strong R&D ability, the technical level is in a leading position. But foreign companies' manufacturing cost is relatively high, compared with Chinese companies, the manufacturing cost is competitive disadvantage, as the Chinese electrical insulating varnish production enterprise technology continues to improve, their share in the international market is increasing, competitiveness in the international market gradually increase.

Main application of insulating varnishes is for electrical equipment such as motors, generators and transformers and to other electrical apparatus in general Grade CB, in most instances, gives maximum protection to the windings from moisture, oil, sea water,

and other deleterious substances. As the economy recovers, the demand for electrical insulating varnish will continue to grow at a high rate.

We tend to believe that this industry still has a bright future, considering the current demand of electrical insulating varnish.

The worldwide market for Electrical Insulating Varnish is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
