Abstracts

This report studies the Electrohydraulic Actuator for industrial market.

Electrohydraulic actuators (EHAs) eliminate the need for separate hydraulic pumps and tubing, simplifying system architectures and improving safety and reliability.

Electrohydraulic actuators incorporate servo valves and electronic controls to provide rod position feedback; thereby ensuring efficient machine operations. This amalgamation heightens accuracy, enhances functionality, improves ease-of-use, and better controls performance.

SCOPE OF THE REPORT:

This report focuses on the Electrohydraulic Actuator in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. In the coming years there is an increasing demand for electrohydraulic actuator in the regions of North America and Europe that is expected to drive the market for more advanced electrohydraulic actuator. Increasing of power fields expenditures, more-intense competition, launches in introducing new products, increasing of spending on general industry, retrofitting and renovation of old technology, increasing adoption of electrohydraulic actuator in developing countries will drive growth in global markets. Globally, the electrohydraulic actuator industry market is low concentrated as the manufacturing technology of electrohydraulic actuator is relatively matures than some high-tech equipment. And some enterprises, like Rotork, Rexa, HOERBIGER and Emerson etc. are well-known for the wonderful performance of their electrohydraulic actuator and related services. At the same time, Europe, occupied 33.06% production market share in 2017, is remarkable in the global electrohydraulic actuator industry

because of their market share and technology status of electrohydraulic actuator.

The consumption volume of electrohydraulic actuator is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of electrohydraulic actuator industry may not keep that fast. But it is surely forecasted that the market of electrohydraulic actuator is still promising.

The worldwide market for Electrohydraulic Actuator is expected to grow at a CAGR of roughly 3.6% over the next five years, will reach 340 million US\$ in 2023, from 270 million US\$ in 2017, according to a new GIR (Global Info Research) study.
