## **Abstracts**

An inertial measurement unit (IMU) sensor is an electronic device that measures and reports a craft's velocity, orientation, and gravitational forces, using a combination of accelerometers and gyroscopes, sometimes also magnetometers. In this report, the high performance IMU sensors were counted and analyzed. We take into account industrial, aerospace, defense applications (even industrial applications are considered as "high-performance" applications, as opposed to consumer ones). This refers to the applications: we take into account all the inertial sensors except the consumer / mobile and the automotive applications.

### **SCOPE OF THE REPORT:**

This report focuses on the Electronic IMU Sensors in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. In the future, the global consumption of Electronic IMU Sensors will show upward tendency further, consumption is expected in 2020 will be 957.05 (K units). The average operating rate will remain at 89% to 92%.

Honeywell, Northrop Grumman, SAFRAN and Thales captured the top four revenue share spots in the Electronic IMU Sensors market in 2015. Honeywell dominated with 34.54 percent revenue share, followed by Northrop Grumman with 19.27 percent revenue share and SAFRAN with 9.25 percent revenue share.

Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area, in future still more new investment will enter into the field. Technology and cost are two major problems.

Although sales of Electronic IMU Sensors brought a lot of opportunities, for the new

entrants with only advantage in capital without sufficient support in technology and downstream channels, the research group did not recommend taking risk the enter this market.

The worldwide market for Electronic IMU Sensors is expected to grow at a CAGR of roughly 4.5% over the next five years, will reach 2110 million US\$ in 2023, from 1690 million US\$ in 2017, according to a new GIR (Global Info Research) study.
