Abstracts

ELISA (enzyme-linked immunosorbent assay) is a plate-based assay technique designed for detecting and quantifying substances such as peptides, proteins, antibodies and hormones. The ELISA has been used as a diagnostic tool in medicine and plant pathology, as well as a quality-control check in various industries. Elisa Analyzers is also called Elisa Microplate Reader or plate reader, which are used to detect biological, chemical or physical events of samples in microtiter plates. ELISA Analyzers are widely used in research, drug discovery, bioassay validation, quality control and manufacturing processes in the hospitals, pharmaceutical and biotechnological industry and academic organizations.

SCOPE OF THE REPORT:

This report focuses on the ELISA Analyzers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Emerging economies, such as Brazil, Argentina and Middle East etc. will become the new power for development of the world economy in the future. With the rapid development of emerging economies, besides promoting economic growth of other countries in Asia, Latin American and African, the region above will become important market of ELISA Analyzers.

Key market players include Thermo Fisher, PerkinElmer, Tecan, BioTek and EUROIMMUN among others.

The ELISA Analyzers industry is moderately competitive, with top four vendors accounting for about 56 % of the industry share. Thermo Fisher is the global largest vendors accounted for 23.41% revenue share of the industry in 2015. Other key players

include DiaSorin, BIO-RAD, Molecular Devices, Dynex Technologies and BMG Labtech among others.

About the difference of price, the multi-function analyzer is expensive than single-function analyzer; optical filter type is expensive than optical grating type product, the price of product from different manufacturers is very different, North America and Europe's product is expensive than China.

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area; the future will still have more new investment enter the field. In the next five years, the sales volume will keep slow increasing but the market revenue scale is forecasted to be reduced because of price downturn

The worldwide market for ELISA Analyzers is expected to grow at a CAGR of roughly 2.8% over the next five years, will reach 700 million US\$ in 2023, from 590 million US\$ in 2017, according to a new GIR (Global Info Research) study.
