Abstracts

Enhanced vision system, a stand-alone thermal imaging camera that sees infrared energy emitting, or radiating, from objects and forms a real-time video image that is displayed on an MFD or dedicated video display screen. The system's primary benefit is improving situational awareness. At night, an EVS eliminates the visual effects of darkness, turning it into day on the display, and enabling the pilot to see and avoid clouds at night. During the day, the system enables the pilot to see through smoke, haze and smog.

SCOPE OF THE REPORT:

This report focuses on the Enhanced Vision System (EVS) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. At present, in developed countries, the Enhanced Vision System (EVS) industry is generally at a more advanced level. The world's large enterprises are mainly concentrated in USA, Europe and Israel.
