Abstracts

This report studies the Epoxy Curing Agents market. The curing process is a chemical reaction in which the epoxide groups in epoxy resin reacts with a curing agent (hardener) to form a highly crosslinked, three-dimensional network. In order to convert epoxy resins into a hard, infusible, and rigid material, it is necessary to cure the resin with hardener. The products are available for a wide range of civil engineering, infrastructure and other building & construction applications.

SCOPE OF THE REPORT:

This report focuses on the Epoxy Curing Agents (Epoxy Hardener) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In the international market, the marketing channels characteristic differ from company to company.

The giant companies are more likely to set their own big agents in some major countries and regions taking charge of regional business building their international market position.

Companies in developing countries such as China and India, in contrast, put more effort on direct selling business. They can act as exports at the same time, and it is a common phenomenon in this industry. As they do not have that much international brand influence, their product quality is not good enough when comparing with leading companies, however, they have price advantage. They like to expand their market

share in developing countries and low-end international market.

In the Epoxy Curing Agents market, there still has a distinct feature that the import and export rate of this industry is not high caused by the fact that many international manufactures expand their business through building factories or investments.

The market is not only influenced by the price, but also influenced by the product performance. Although China domestic companies have price advantage, the application is narrow to some extent due to the poor manufacture processing, cheap raw material and less diversity of products.

The leading companies own the advantages on better performance, more abundant product's types, better technical and impeccable after-sales service. Consequently, they take the majority of the market share of high-end market.

The worldwide market for Epoxy Curing Agents (Epoxy Hardener) is expected to grow at a CAGR of roughly 4.8% over the next five years, will reach 3970 million US\$ in 2023, from 2990 million US\$ in 2017, according to a new GIR (Global Info Research) study.
