Abstracts

Fault circuit indicators are devices which indicate the passage of fault current. When properly applied, they can reduce operating costs and reduce service interruptions by identifying the section of cable that has failed. At the same time, fault indicators can increase safety and reduce equipment damage by reducing the need for hazardous fault chasing procedures.

SCOPE OF THE REPORT:

This report focuses on the Fault Circuit Indicators in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In recent years, the demand for electricity has been growing and the power grid has been developing. This trend has made the demand of Fault Circuit Indicators become larger and this trend can be anticipated to fuel the market growth during the forecast period.

The market of Fault Circuit Indicators is relatively concentrated. SEL and Horstmann are the largest producers in the world with 11.54% and 10.51% respectively in 2015.

Cooper Power Systems and Thomas & Betts are also large manufacturers than other smaller companies with 5.12% and 7.37% respectively in 2015. Other companies have much smaller market with no more than 10% of the market.

The production of Fault Circuit Indicators was largest in China in 2015, which accounts for 33.95% of the market. Europe is the second large production area with 22.95% in 2015 while US is the third largest with 20.89% in 2015. In terms of consumption, China is the largest market because of the fast demand of power grid.

The worldwide market for Fault Circuit Indicators is expected to grow at a CAGR of roughly 2.9% over the next five years, will reach 170 million US\$ in 2023, from 140 million US\$ in 2017, according to a new GIR (Global Info Research) study.
