SCOPE OF THE REPORT:

This report focuses on the Feed and Aquafeed in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Asia, especially China, is the largest producer and consumer of Feed and is expected to retain the higher growth rate during the next five years due to strong growth in domestic animal breeding industry. Actually, that is why manufacturers have several plants, usually close to aimed demand market.

The Feed industry is highly dispersion; there are more than one hundred manufacturers (production 20 K MT grade) in the world, the top 17 manufacturer's sales account only

about 18% of global.

Looking at global livestock species in 2016, poultry held its position as industry leader with a 42% of the feed market at 30 million tons. Pigs saw the largest percentage of growth, with nearly 4 percent increase.

Corn and soybean meal are the standard feed ingredients globally, Raw materials account for 80 to 90 percent of feed millers' costs, so rising costs are influencing company strategies.

The import and export business of this industry is not frequent. The main reason lies in that many international manufacturers expand their business through building factories or investments in targeted markets. Also, many major players have built up plants in worldwide.

The worldwide market for Feed and Aquafeed is expected to grow at a CAGR of roughly 2.0% over the next five years, will reach 572400 million US\$ in 2023, from 508300 million US\$ in 2017, according to a new GIR (Global Info Research) study.
