Abstracts

Ferronickel is a ferroalloy. Its CAS number is 11110-39-7. It is a shiny metallic solid material and can be obtained from the carbothermic reduction of serpentinitic minerals, such as serpentine, limonite, or garnierite. It enables the production of products with special electronic, magnetic and catalytic properties.

Ferronickel remains stable under normal storage conditions; however, when exposed to carbon oxides in reducing atmospheres, there is a risk of forming the toxic gas nickel carbonyl.

SCOPE OF THE REPORT:

This report focuses on the Ferronickel in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. In consumption market, the growth rate of global consumption volume is smooth relatively. USA, China and Europe are still the mainly consumption regions due to the advanced production technology and rapid development of economy. Ferronickel can be classified as some types depend on the content of nickel, such as Ferronickel?Nickel

Contents

1 MARKET OVERVIEW

- 1.1 Ferronickel Introduction
- 1.2 Market Analysis by Type
 - 1.2.1 Ferronickel?Nickel
