Abstracts

Laser drilling is the process of creating “popped holes” or “percussion drilled” holes in a material, which is achieved by pulsing a laser beam on a particular area repeatedly. Fiber laser light is created by banks of diodes. The light is channeled and amplified through fiber optic cable similar to that used for data transfer. The amplified light, on exiting the fiber cable, is collimated or straightened and then focused by a lens onto the material to be cut.

SCOPE OF THE REPORT:

This report focuses on the Fiber Laser Drilling Machine for Automotive in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

As international economic situation is complicated, in the next few years there will be many uncertainties. Due to economic development and the high sales of Fiber Laser Drilling Machine in the international market, the current demand for Fiber Laser Drilling Machine product is relatively stable in the mature market, such as North America and Europe, but the demand in Asia-Pacific is relatively higher due to the downstream demand.

Fiber Laser Drilling Machine is mainly manufactured and sold by Trumpf, Bystronic, Coherent, Prima Power and Jenoptik; and these companies occupied about 76.04% market share in 2016.

Geographically, Europe is the largest sales market in the world, which took about 29.46% of the global consumption volume in 2016 and share 40.51% of global total revenue.

Although sales of Fiber Laser Drilling Machine brought a lot of opportunities, the study group recommends the new entrants who just having money but without technical advantage and downstream support, do not to enter into the Fiber Laser Drilling Machine field hastily.

The worldwide market for Fiber Laser Drilling Machine for Automotive is expected to grow at a CAGR of roughly 3.4% over the next five years, will reach 78 million US\$ in 2023, from 64 million US\$ in 2017, according to a new GIR (Global Info Research) study.
