### SCOPE OF THE REPORT:

This report focuses on the Fishmeal in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Currently, the world's largest fishmeal manufacturing area is still in Peru, but in recent years, Peru's fishmeal production dropped significantly, resulting in a tight supply market in recent years. But also led to the global fish meal prices up. By the end of 2014, the world's fish meal price is about 1545USD / MT. But with the 2015 production rose in Peru area will alleviate this condition. There will be price decline too.

2. The world's largest consumer market in China and Asia, which along with China regional economic development, rising demand for fish meal, so China needs to import a large amount of fish each year, according to Chinese customs data show that in 2014 China imported a total of fishmeal 1340K MT of which about 80% comes from Peru. Thus Peruvian fishmeal production is largely affected China's fish market.

Although China is the world's largest fish consumer market, but production in China has been low, but serious excess capacity, mainly because fisheries in China surrounding seas is far from ideal status, thus leading to the operating rate in China on the serious shortage of fish meal production.

At present, China manufacturing technology still has a great lack of high-end fish meal, which is a Chinese big problem to development factors. The next few years, if not encountered intense natural disasters, the global fish market does not appear large fluctuations, China's self-sufficiency rate will continue to increase. Although the market is not clear in the coming years, but due to the profit in fishmeal industry is pretty good, while the global demand is relatively stable, the group is optimistic about this industry.

The worldwide market for Fishmeal is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
