Abstracts

A Flange nut is a nut that has a wide flange at one end that acts as an integrated, non-spinning washer. This serves to distribute the pressure of the nut over the part being secured, reducing the chance of damage to the part and making it less likely to loosen as a result of an uneven fastening surface.

SCOPE OF THE REPORT:

This report focuses on the Flange Nut in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. These nuts are mostly hexagonal in shape and are made up of hardened steel and often coated with zinc.
