Abstracts

Flavonoids are water soluble polyphenolic molecules containing 15 carbon atoms. Flavonoids belong to the polyphenol family. Flavonoids can be visualized as two benzene rings which are joined together with a short three carbon chain. One of the carbons of the short chain is always connected to a carbon of one of the benzene rings, either directly or through an oxygen bridge, thereby forming a third middle ring, which can be five or six-membered. The flavonoids consist of 6 major subgroups: chalcone, flavone, flavonol, flavanone, anthocyanins and isoflavonoids.

SCOPE OF THE REPORT:

This report focuses on the Flavonoids in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Flavonoids are natural ingredients extracted from plants. Due to the distribution characteristics of raw materials, manufacturers of this industry are mainly located in Asia Pacific, especially China. SANREN Bio-Technology, Zhejiang Conler Pharmaceutical, Chengdu Okay, Sichuan Deebio Pharmaceutical, Hunan Kang Biotech, ADM, Frutarom Health, Shaanxi Huike, Taiyo Green Power, TEAREVO and Hunan Sunfull Bio-tech are major manufacturers of this industry. SANREN Bio-Technology is a global leader. In 2017, the sale of SANREN Bio-Technology was 393.9 tons, and the company held a share of 10.3%. SANREN Bio-Technology, Zhejiang Conler Pharmaceutical, Chengdu Okay, Sichuan Deebio Pharmaceutical, Hunan Kang Biotech, Sichuan Xieli Pharmaceutical and Shaanxi Huifeng Pharmaceutical are the world's leading hesperidin manufacturers. ADM, Frutarom Health and Shaanxi Huike are the major manufacturers of daidzein. Taiyo Green Power, TEAREVO, Hunan Sunfull Bio-

tech and Infré are global leaders of catechin.

At present, there are thousands kinds of favonoids. However, only dozens of products have been commercialized. Only hesperidin, daidzein, catechin and genistein have a larger market size. Most of the raw material production areas of favonoids are located in China, which has led to the emergence of a large number of manufacturers in China. Chinese manufacturers export their products to Europe, the United States and Japan in large quantities either directly or through traders. Due to the low level of industry concentration, few companies can be called top manufacturers.

The worldwide market for Flavonoids is expected to grow at a CAGR of roughly 3.7% over the next five years, will reach 210 million US\$ in 2023, from 170 million US\$ in 2017, according to a new GIR (Global Info Research) study.
