Abstracts

A force gauge (also force gage) is a small measuring instrument used across all industries to measure the force during a push or pull test. Applications exist in research and development, laboratory, quality, production and field environment. There are two kinds of force gauges today: mechanical and digital force gauges.

Torque Meters are devices designed to determine the torque or torsion in a shaft, usually by measuring the twist in a calibrated length of shafting.

SCOPE OF THE REPORT:

This report focuses on the Force Gauge and Torque Meters in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

First, for industry structure analysis, the Force Gauge and Torque Meters industry is relatively fragmented. The top five producers account for about 50.34% of the revenue market. Regionally, Europe accounted for the largest consumption market share of 30.15% in 2015, but Asia has the largest production growth rate in recent years.

Second, the production of Force Gauge and Torque Meters increases from 69.18 K Units in 2011 to 91.73 K Units in 2016, with an average growth rate of more than 5.8%. Third, North America occupied 32.59% of the Revenue market in 2015. It is followed by Europe and Asia, which respectively have around 29.98% and 25.18%.

Fourth, for price trend analysis, a key variable in the performance of Force Gauge and Torque Meters producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

Fifth, for forecast, the global Force Gauge and Torque Meters revenue would keep increasing with annual growth rate with 4~5%, and a little higher speed in Asia. We tend

to believe that this industry still has a bright future, considering the current demand of Force Gauge and Torque Meters. As for product prices, the slow downward trend in recent years will continue in the next few years, as competition intensifies. Similarly, there will be fluctuations in gross margin.

The worldwide market for Force Gauge and Torque Meters is expected to grow at a CAGR of roughly 4.4% over the next five years, will reach 75 million US\$ in 2023, from 58 million US\$ in 2017, according to a new GIR (Global Info Research) study.
