Abstracts

A filter press is a solid-liquid separation device that uses the principle of pressure feeding. It has a series of filter plates arranged together and recessed plates or frames that are arranged in an alternative manner. The filter medium is arranged in between the filter press plates. A feeding pump is used for forcing liquid through a medium, thus leaving solids trapped inside. When compared with other pressure filters, the filter press holds a higher volume of solids per square foot of the filtering surface area. The closer which is required is hydraulically or manually operated. It contains a controller, which presses the filter plates together, thus creating a sealed unit. The hydraulic system, which is best suited for dewatering applications, is typically dependent on the size of the filter press required.

SCOPE OF THE REPORT:

This report focuses on the Frame Filter Press in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
The latest trend gaining momentum in the market is emergence of next generation filter presses. The next generation pneumatic filter presses are safe, easy to handle, and have competitive pricing. These filter presses are technologically advanced and do not rely on electricity. They can operate by simply connecting to compressed air. One of the major drivers for this market is growing awareness for waste water treatment. The demand for clean water is ever growing. Thus, the use of wastewater is gaining momentum as a reliable alternative source of water that can be tailored to meet water requirements. A shift over the past few years in wastewater management, from its

treatment and disposal to its reuse, recycle, and recovery, has led to a new concept of wastewater, not as a problem but a source of energy and other resources, including water itself.The major factors hindering the growth of this market is Closure of mines due to environmental concerns. Many mines worldwide are being shut due to environmental concerns. There are few mines that are being closed temporarily due to the downfall in commodity prices across the world. In 2017, the Department of Environment and Natural Resources (DENR) announced the closure of 23 mining operations in many areas in the Philippines.

The worldwide market for Frame Filter Press is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US$ in 2023, from xx million US$ in 2017, according to a new GIR (Global Info Research) study.

There are 15 Chapters to deeply display the global Frame Filter Press market.

Chapter 1, to describe Frame Filter Press Introduction, product scope, market overview, market opportunities, market risk, market driving force;

Chapter 2, to analyze the top manufacturers of Frame Filter Press, with sales, revenue, and price of Frame Filter Press, in 2016 and 2017;

Chapter 3, to display the competitive situation among the top manufacturers, with sales, revenue and market share in 2016 and 2017;

Chapter 4, to show the global market by regions, with sales, revenue and market share of Frame Filter Press, for each region, from 2013 to 2018;

Chapter 5, 6, 7, 8 and 9, to analyze the market by countries, by type, by application and by manufacturers, with sales, revenue and market share by key countries in these regions;
