SCOPE OF THE REPORT:

This report focuses on the GaAs Devices in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In this industry research report, analysts have estimated the mobile devices segment to dominate the GaAs devices market during the forecast period. This market segment is likely to account for more than 50% of the market share. The augmented demand for smartphones in the global market and the rise in data consumption through wireless networks will result in the high demand for GaAs devices during the forecast period. The APAC dominated the market and accounted for more than 70% of the market share. Due to high demand for GaAs devices from the communication device manufacturers in the region, this market is expected to have a positive outlook in the region. Moreover, the rising demand for power applications and the presence of high-growth economies in APAC will continue to drive the market in APAC.

The worldwide market for GaAs Devices is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
