Abstracts

A garden tool is any one of many tools made for gardens and gardening and overlaps with the range of tools made for agriculture and horticulture.

SCOPE OF THE REPORT:

This report focuses on the Garden and Lawn Tools in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In terms of revenue, the lawn mowers segment dominated the market and will continue to lead the market in the coming years. Gas-powered lawn mowers are useful for mowing large lawns and gardens as these do not have an electric cord. Although the gas-powered lawn mowers segment currently dominates the market, their sales are gradually decreasing with increasing consumer awareness of the adverse impact of these mowers on the environment. The introduction of battery-powered and hybrid lawn mowers will contribute to this segment's growth in the market.

The residential segment accounted for the majority of market shares and will continue to lead the market during the forecast period. The growing popularity of outdoor landscaping is helping raise the demand for power lawn and garden equipment in the residential segment. Furthermore, it is also anticipated that manufacturers will also benefit from the completion of new housing projects, and the demand for garden tools will increase from first-time house buyers.

The worldwide market for Garden and Lawn Tools is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
